Professional Summary

AI & Full Stack Developer with experience in designing intelligent applications using Machine Learning, Computer Vision, and Natural Language Processing, along with building responsive full-stack web applications. Proficient in Java, Python, JavaScript, React, FastAPI, SQL, MongoDB, OpenCV, and Scikit-learn. Strong foundation in core computer science concepts including Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Dedicated to continuous learning and delivering impactful, scalable software solutions.

Education

AIML — Cambridge Institute of Technology, Bengaluru

CGPA: 8.8 — 2027

XII (PUC) — St. Joseph's Indian Composite PU College, Bengaluru

89.16% — 2023

Technical Skills

Languages: Java, Python, C, JavaScript, SQL

Frontend: ReactJS, React Native, HTML5, CSS3

Backend: FastAPI, REST APIs

AI / Machine Learning: NLP, Scikit-learn, OpenCV, Pandas, NumPy

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, Jupyter Notebook, Postman, Power BI, Tableau

Professional Experience

Full Stack Developer Intern – Krytil [Remote]

(Mar 2026 – Sep 2026)

- Developed responsive full-stack web applications using React.js, JavaScript, HTML, and CSS, delivering user-friendly and maintainable interfaces.
- Designed and integrated RESTful APIs to enable efficient frontend-backend communication and support scalable application architecture.
- Created and optimized database schemas to improve data organization, retrieval efficiency, and application performance.
- Collaborated using Git-based version control while following software development best practices, debugging techniques, and testing workflows.
- Participated in feature implementation, application deployment, and maintenance to ensure reliable and high-quality delivery.

Projects

• Agentic Honeypot – Scam Detection & Intelligence System

- Developed an AI-powered honeypot system that interacts with scammers and captures fraud messages for analysis.
- Extracted critical intelligence such as phone numbers, UPI IDs, phishing links, and scam patterns using automated processing.
- Designed a scalable workflow for real-time scam monitoring and cybersecurity threat intelligence generation.

Tech Stack: Python, FastAPI, AI Agents, NLP, MongoDB

• Fake Job Detector – NLP-Based Scam Job Detection System

- Built a machine learning web application that identifies fraudulent job postings using NLP techniques.
- Implemented TF-IDF vectorization and Logistic Regression to classify job listings with high accuracy.
- Deployed the solution for real-time analysis, helping users detect potential employment scams.

Tech Stack: Python, Scikit-learn, NLP, Streamlit, Machine Learning

• Hand Sign Detection System

- Developed a real-time hand gesture recognition system using Computer Vision and Machine Learning techniques.
- Utilized OpenCV and MediaPipe to detect hand landmarks and classify gestures from live webcam input.
- Optimized image processing pipelines to achieve accurate and low-latency gesture recognition.

Tech Stack: Python, OpenCV, MediaPipe, Computer Vision, Machine Learning

Achievements

- **Solved 150+ Data Structures and Algorithms problems on LeetCode and earned the 50 Days Badge.**
- **Maintained a CGPA of 8.8/10 in B.E. Artificial Intelligence & Machine Learning.**
- **Successfully completed the Samsung Innovation Campus AI/ML industry training program.**

Certifications

- **Machine Learning (NPTEL)**
- **Data Science (Infosys)**
- **Advanced Computer Networks (NPTEL)**
